personnel and to provide integrated service delivery for basic reproductive and child health care.

(ii) The medium-term objective is to bring the total fertility rates to replacement level by 2010, through vigorous implementation of inter-sectoral operational strategies.

(iii) The long-term objective is to achieve population stabilisation by 2045, at a level consistent with the requirements of sustainable economic growth, social development, and environmental protection.

The National Population Policy envisages mainstreaming the Indian System of Medicine and Homoeopathy. Incorporating the ISM&H in basic reproductive and child health care will expand the pool of effective health care providers, optimize utilization of locally based remedies and cures, and promote low-cost health care. This involves:

Providing appropriate training and orientation in respect of the RCH programme for the institutionally qualified ISM&H medical practitioners and utilizing their services to fill in gaps in manpower.

Utilizing the ISM&H institution, dispensaries and hospitals for health and population related programmes.

Disseminating the tried and tested concepts and practices of the indigenous system of medicine, together with ISM&H medication at village maternity huts and at household levels.

Utilizing the services of ISM&H "barefoot doctors' after appropriate training and orientation.

**Developing Indian System in the light of indigenous medicines**
